

Do your peeners have the Balls for Polyken 253?

Merco Company

*Stick With Merco™
Quality tapes since 1972*

Polyken 253. *THE* masking duct tape in the shot peening industry.

Polyken 253 is specially formulated for conformability, abrasion and puncture resistance. And at 13 mils thick it's one of the heaviest duct tapes on the planet. An aggressive adhesive, 50 oz/psi, makes sure it holds where you apply it, yet you can remove this tape clean even after exposure to temperatures of 200°F.

Merco Tape is supplying most of the major contractors in the US, and you should be buying from us too. If you're not already using **Polyken 253**, call us today for a sample. If you are, call for a quote.

At Merco, we've been converting, manufacturing and supplying quality tape for two generations now, since 1972. Quality guaranteed. Performance guaranteed. Price guaranteed. So no matter how big your balls are, you should trust your job to nothing less than Polyken, and your supply chain to Merco Tape.
